HAMILT®N

500 μL Microliter Syringe Model 750 N, Cemented Needle, 22 gauge, 2 in, point style 2

Specification Sheet (Part/REF # 80800)

Split/splitless injection consists of a heated chamber with a glass liner into which the sample is injected through the septum. A microsyringe is used to inject the sample through a rubber septum into a flash vaporizer chamber at the head of the column.
