## HAMILT®N

## 100 μL Gastight Syringe Model 1810 RN, Small Removable Needle, 22s gauge, 2 in, point style 2

Specification Sheet (Part/REF # 84886)

Split/splitless injection consists of a heated chamber with a glass liner into which the sample is injected through the septum. A microsyringe is used to inject the sample through a rubber septum into a flash vaporizer chamber at the head of the column.

## **Product Specifications**

| Volume                | 100 μL                        |
|-----------------------|-------------------------------|
| Syringe Type          | Gastight                      |
| Syringe Series        | 1800                          |
| Termination           | Removable Needle (RN)         |
| Needle                | Small RN                      |
| Gauge                 | 22s gauge                     |
| Point Style           | 2                             |
| Needle Length         | 2 inch (51 mm)                |
| Fluid Path            | SST, borosilicate glass, PTFE |
| Autoclavable          | Yes                           |
| Gas Sterilizable      | Yes                           |
| Pressure              | 1000 psig (68.9 bar)          |
| Maximum Temperature   | 115°C / 239°F                 |
| Minimum Temperature   | 10°C / 50°F                   |
| Barrel Inner Diameter | 0.057 inches (1.46 mm)        |
|                       |                               |
